

## Q&A Test Sheet - Student Answers

1. What is the main function of a web server?

A web server's job is to respond to requests from browsers. It sends website files to the user.

2. Explain the difference between SQL and NoSQL databases.

SQL databases use tables to store data, but NoSQL databases can use documents or graphs. NoSQL is more flexible and can scale out more easily. SQL is better for things like banking systems.

3. What is the capital of Japan?

Answer: The capital is Kyoto.
